JOHANNES GUTENBERG

Der deutsche Erfinder des Buchdruckens mit beweglichen Lettern. Er wurde am 24. Januar 1397 in Mainz geboren. Er ist der Erfinder des Buchdruckens mit beweglichen Lettern. Er wurde am 24. Januar 1397 in Mainz geboren. Er ist der Erfinder des Buchdruckens mit beweglichen Lettern.

TELEPHONE

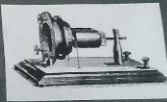

The telephone was invented in 1876 by Alexander Bell. It was the first device that allowed people to talk to each other over a distance. It changed the way we communicate and made it easier to stay in touch with people who are far away.

TELEPHONE

THE TELEPHONE WAS INVENTED BY ALEXANDER GRAHAM BELL IN 1876. IT WAS INVENTED IN ORDER TO BE ABLE TO COMMUNICATE WITH OTHERS REMOTELY. IN 1877, A COMPANY WAS FOUNDED THAT SELLS TELEPHONES ALL OVER THE WORLD. CURRENTLY, HARDLY ANYONE HAS IT. I CHOSE THIS INVENTION BECAUSE NOWADAYS IT IS DIFFICULT TO LIVE WITHOUT IT.

The first telephone was invented in 1876. Alexander Graham Bell was the inventor of the first phone. Now the telephone is very useful in our everyday life. We call our phones - SMARTPHONES. People use phones to make calls, send messages and listen to music. Phones have digital cameras so we can take photos and make films. Telephones are small computers. We can watch films, surf the Internet, play games on them.

ATMs are very important in modern life because you no longer have to wait in line for an hour to withdraw money, you just go to an ATM and do it in two minutes.

The first ATM was designed by Luther G. Simjian, but the real one was designed by John Shepherd-Barron.

This real ATM was first set up by Barclays Bank in London on June 27, 1967.

In the beginning, special vouchers were used to withdraw cash.

There are 5 types of ATMs, one of them is CD (Cash Dispenser - a machine that dispenses only cash).

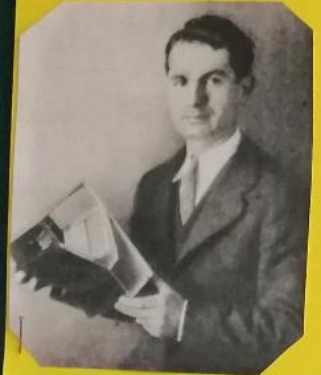

The ATM is a vertically placed box with a monitor, keyboard and holes for credit cards or money.

This machine basically consists of 2 parts: a computer and a safe.

The ATM is said to be inspired by a chewing gum machine.

The first ATM in Poland appeared in 1991.

By the end of the 1960s, there were already 781 ATMs in the world.

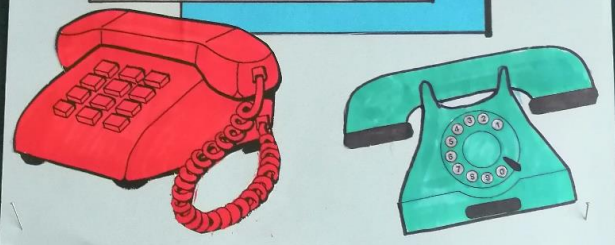

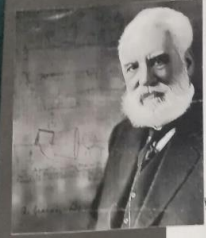

Invention of the telephone

The history of the telephone dates back to 1667, when English polymath Robert Hooke created the first acoustic string telephone. Telephone, an instrument designed for the simultaneous transmission and reception of the human voice.

The telephone is inexpensive, is simple to operate, and offers its users an immediate, personal type of communication that cannot be obtained through any other medium. As a result, it has become the most widely used telecommunications device in the world. Billions of telephones are in use around the world.

ING WITHOUT

CAMERA

The camera was invented by the Susse brothers.

In 1839, they created equipment for taking pictures using the daguerreotype technique.

WITH RECYCLING

ELECTRIC CURRENT

Benjamin Franklin was born on January 17, 1706 in Boston as the tenth son of seventeen children. His father, after the death of his first wife, Josiah married Abiah Folger, who gave birth to more children and was a housewife.

Benjamin Franklin

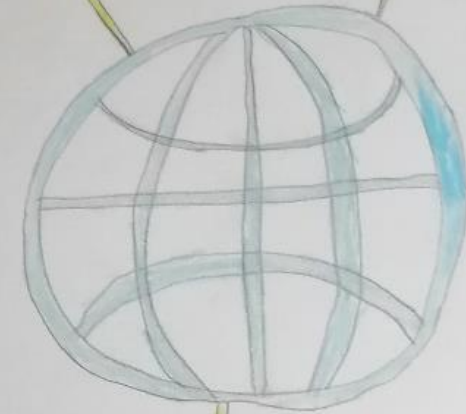

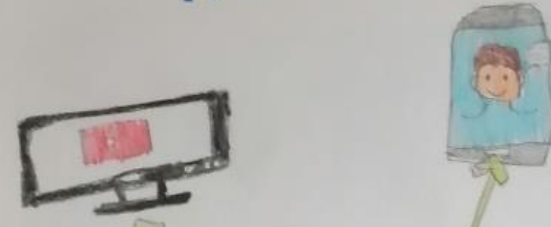

The discovery of electricity was a process that actually stretched back over two thousand years. It is, however, B. Franklin III who in 1752, using a leaden tittel he showed for the first time that lightning is simply an electrical discharge but on a very large scale.
The kite experiment - Franklin, fastened a tipped wire to the kite so that it protruded a foot or more above the trees. To the end of the thread, he fastened a silk cord close to his hand and put a key where the thread and silk were joined.

MOBILE PHONE

First mobile phone came in the year 1940 and called mobile. That's because it is a wireless mobile. This phone was invented by a man named Alexander Graham Bell.
First mobile phone invented in 1940.
First mobile phone has been used in 1945.
First mobile phone came from the company "Motorola".
First talking on the phone was in 1912.
First GSM has been used in 1991.
First mobile phone called "MobiCom".

"INTERNET"

Internet is a very important in present time.
Internet was in 1990 not popular.

Internet be very important for children who want watch animation films.
Internet is a cheap and fast.
Internet was discovered in 1969.
